About This Content

The Class 156 DMU, also known as a Super Sprinter, was built from 1987 to 1989 by Metro-Cammell as part of the effort to replace the ageing fleet of first-generation DMUs dating back to the 1950s. The Class 156s were all built as two-car sets, each set comprising a pair of driving motor units. Powered by 6-cylinder diesel engines, Super Sprinters are rated to run at 75mph and are used mainly for suburban and short-haul branch line duties. All units have now passed from British Rail ownership into private hands, and are currently in operation with a number of train operators including Scotrail, Northern Rail, East Midlands Trains, and National Express East Anglia.

**Please note that the Class 156 cannot be controlled using the in-game HUD driver interface or Xbox controller.

Updated Features

- Projecting exterior headlights for low light visibility
- Cab night lighting (activated using Shift + L)
- QuickDrive Compatible

Key Features:

- Advance Warning System (AWS) self-test routine.

BIO

Burke, Willow H. PhD
Age: 38

Characteristics:
B.S. Aerospace Case supported by the J.C.F. Case
Department. PhD in Computer Science from the
Federation Science Foundation. Licensed
Prof. of Astrophysics and Astronautics
Prof. of Astronautics

Dr. Willow Burke has an extensive academic career and is
well-versed in military matters.

A self-proclaimed "military geek," Willow Burke was raised by
Lt. "Big" Burke, a high-ranking and veteran officer. Her
education was based around military operations using the
lessons of the latter World Wars. There she witnessed the
importance of being ready for an emergency. She joined the
military and called her "to be prepared" the mission.
She grew to know and love the military life.

I loved most or if not all their content in phone or steam in the past, even gave positive reviews but this seemed like a copy from their earlier releases with some additions but the quality from this looks either rushed or less funded, harbinger looks like a newer title yet is older. Grap your weapons soldier, we have crystal to destroy and it ain't gonna be pretty. Not true :) It's fun to swap roles and attack insted... Though the defending is still lot better... 7/10. This game feels like the 1990s and it does not make me sad.. this is great.. this app save my time to develop game. game is♥♥♥♥♥♥♥♥

. Tried abd tried but it won't let me bind the controls the way I want.. A Hardcore Adventure game with many bugs!

Well, if you ever consider to buy this one,have in mind that it may be NOT playable in your system. The game has many bugs that make it a headache. Whoever tries to, please install it under C: directory. Don't know if you have Steam under C: but the Steam client accepts to install a game in whatever drive you want. Feel free to give administrator permissions and I hope it plays because it may NOT...

The graphics are good for an adventure game but I would like a widescreen but NO, there isn't. It has video cutscenes that make it good. It's all 3D and good looking.

The story is black. The game is attractive but after a while playing it you'll feel that you think black,too. After all the game is for late teens and adults. It has many things in the dialogues and in view that newer eyes would be sensitive. The game is full of black humor but ... it has really many dialogues and so many black jokes that in many cases it will be tiresome. You're supposed to be a female vampire that NEVER accepted her later nature and tries to free herself from her master and his castle. The game was written by some makers of Monkey Island series but no way,it's not like them, One more thing you have to consider is that the second part of the game NEVER been made. So, don't search why the game ends this way, leaving many question marks behind.

The sounds are pretty good. Black music and very good voices make the game excellent at this point.

The riddles. You will be SO TIRED of them. Even the hardcore Adventurer will want to see a walkthrough. The game never stops having riddles. Riddles everywhere. And the possibilities are many. Because you have always to compare the new and the OLD and try them too. And it has many things in the environment that you will NEVER use. I was really tired of this game. And if it wasn't an OLD quality game I would place a negative review. I place a positive one for the game. As much for the controls, keep "Tab","Space", left and right click in mind.

If you want to buy at your own risk and the game is playable under your system,if you can handle so many riddles in a very short space, if you like so many lines of dialogues and black humor then this game is for you.

I would say that this is a Hardcore Adventure game with many bugs!

. The game is pure base on luck and too hard.. Such a classic game! I used to play the demo which came with Comanche: Gold. I thought it was hard then and buggy. Though it's actually easier when I play it now! It was pretty long back then, but now, I beat a mission in 5 mins! Though I prefer it when it was longer. Memories. Don't mind the graphics, it's like 8 bits. Great game. 10/10! You have to buy it and the other games in the series, especially Black Hawk Down! So fun!. Awful on every level. Tutorial is no help at all in understanding how the game is supposed to play. Do not waste your time on this.

tanto este quanto o seu sucessoraobons. Great game so far. Immersive, intuitive, challenging and fun. Needs more content and balancing, in the best case MP, but the foundation is very promising!

@Devs: Keep up the good work! @Vivers: Highly recommended!. A brilliantly complex game. An excellent space warfare sim with a very high level of customization and control. Players even get to make their own ship designs. :) The developers are still actively maintaining and improving it too.. A hidden gem.. This game should cost more! Really! It's amazing, the quality doesn't equal the price.

The soundtrack is good.

The gameplay it's really fluid.

The characters are lovable, even the bosses have their own personalities!.

Edit: They now have a deserved price!. Excellent short time waster, even if you don't have someone to co-op with (you can play against a Bot. The game itself can be completed with 3 stars on every stage within a little over an hour. If you like to 100% the achievements, you'll grind endless mode for another few hours to get the cash to buy all the choppers. Definitely worth \$1, even better if you can get it on sale.
